

Supplementary Figure 1

Supplementary Figure 1. Effects of AUY922 on apoptosis in the non-HTLV-1 related T-cell lines.

The non-HTLV-1 related T-cell lines Jurkat and Molt4 were treated with or without AUY922 100 nM for 48 and 72 hours, then harvested, stained with Annexin V-PI, and analyzed using flow cytometry. Data shown represent the percentages of apoptotic cells among untreated and AUY922-treated cells.
